# About

At Hashcrypt Technologies Pvt Ltd...

## We Listen, We Collaborate, We Deliver

The story of Hashcrypt Technologies Pvt Ltd begins not in a boardroom, but in the [vibrant heart of Rajkot](#). It's a story fueled by a passionate dream - not just to be another [IT service provider](#), but to become the launchpad for your [digital transformation](#). We envisioned ourselves as the architects of change, the unwavering support system that helps businesses take flight.

## Our IT Service Provider Journey Since 2015

As we delved into the depths of coding and design, we discovered the magic of [collaboration](#). The synergy that arises when minds unite in pursuit of a common goal. Each line of code, each pixel perfected, was a testament to our commitment to [excellence](#) and [innovation](#).

Since then...

We Deliver Over 500 Projects for Over 300 Different Companies...

 **Killian Coq**

I have now been working with the Hashcrypt team on different parts of a project and they always meet my expectations. It was a very complicated project and many other developers had not succeeded. Their team was able to solve my problems. Long-term project on a SaaS using Facebook, Instagram, LinkedIn, and Google APIs. Front end and back end. Easy to talk with and always available.

 **Randon Adams**

Hashcrypt went above & beyond my expectations. He not only did the job well. He had great communication the whole time & even when he went through all of the job requirements he noticed it was a lot more work than initially required. he was absolutely right & he still did the work for me so if you need a programmer no need to look anywhere else, Hashcrypt will be doing all of my work for my website for now on.

 **Gavin McKenzie**

The hashcrypt team was one of over 200 applicants that we trawled through and it was a good decision. We purposely did not give them very much of a design brief to see what they came up with - we only provided logos, images, text, and page titles and he came up with a couple of nice WP sites for us.

 **Joel Couchman**

I have had the pleasure of working with Hashcrypt on two different projects now, and each experience has been outstanding. They consistently deliver high-quality work, meet deadlines, and communicate effectively throughout the process. If you're looking for a reliable and skilled freelancer, Hashcrypt is an excellent choice.
